Portfolio: mirzafahad.github.io
Github : github.com/fahad80

Summary:

An Embedded Engineer with expertise in rapid hardware prototyping, firmware development, and testing.

Skills:

Languages : C, Python; Familiar with: C++, MATLAB, Assembly, LabVIEW;
Electronics : SMD Soldering, Bus Analyzer, Oscilloscope, Debugger, Spectrum Analyzer;
PCB : Eagle, Proteus;
Protocols : I2C, SPI, UART, RS485, DMX512, RS232;
IoT : LoRaWAN; Familiar with: Bluetooth 5, RFID, ZigBee, MQTT, AWS;
Concepts : Unit Test, TDD, Version Control, SQLite, JSON, Google style guide, Static code analysis.

Professional Affiliation:

Embedded System Engineer | *7-Eleven Cashierless* 📍Irving, Texas 📅 04/2019 – Present

- Leading the hardware development for our cashier-less stores.

Firmware Engineer | *Haxiot Inc.* 📍Plano, Texas 📅 03/2017 – 03/2019

- Led the firmware development of LoRaWAN software stacks for a modem and an IoT end-device. Designed two LoRaWAN developer kits and developed both C and Python library for those.
- Developed Windows application, using PyQt, for our manufacturer that flash and test batch of 16 modems simultaneously during production and then scan QR of the modems using OpenCV.

Embedded System Engineer | *Next Gen Systems* 📍Arlington, Texas 📅 06/2014 – 07/2016

- Collaborated with three multidisciplinary teams to solve challenges in sensor integration for robots, from designing hardware, developing their associated firmware to interface them with Robot Operating System.
- Automated MEMS sensor fabrication process and sensor characterization testbed that reduced the production time by 90% and halved the wastage.

Technical Lead (TechshopBD) | *Pi Labs Bangladesh Ltd.* 📍Dhaka, Bangladesh 📅 04/2012 – 07/2013

- Tripled the product sale within 6 months with the help of a dedicated team and by emphasizing on local quality production and customer relation.
- Designed development kits, wrote tutorials, provided technical support, and handled customers first-hand.

Embedded Firmware Engineer | *Pi Labs Bangladesh Ltd.* 📍Dhaka, Bangladesh 📅 08/2010 – 03/2012

- Designed the initial iteration of our Vehicle Tracking System hardware and developed the device driver for the onboard components.
- Led a quality control team of three. Debugged and tested numerous hardware of 9 different products.

Academic Projects:

Remote Sensor Monitoring – build a low-cost IoT system that remotely monitored sensors (temperature, humidity, force), using Wi-Fi SoC that supports full-stack TCP/IP and Microsoft Azure IoT service.

Academic Credentials:

M.Sc. in Electrical Engineering, The University of Texas at Arlington (UTA), May 2016.

B.Sc. in Electrical Engineering, Ahsanullah University of Science & Technology, July 2009.
