Github : github.com/mirzafahad

Summary:

An Embedded Engineer with expertise in rapid hardware prototyping, firmware development, and testing.

Skills:

Languages : C, Python; Familiar with: C++, MATLAB, Assembly, LabVIEW;
Electronics : SMD Soldering, Bus Analyzer, Oscilloscope, Debugger, Spectrum Analyzer;
PCB : Eagle, Proteus;
Protocols : I2C, SPI, UART, RS485, DMX512, RS232;
IoT : LoRaWAN; Familiar with: Bluetooth 5, RFID, ZigBee, MQTT, AWS, Kafka;
Concepts : Unit Test, Version Control, SQLite, JSON, Google style guide, Static code analysis, MISRA C;

Professional Affiliation:

Embedded System Engineer | *7-Eleven Cashierless* 📍Irving, Texas 📅 04/2019 – Present

- Leading the hardware development for our cashier-less stores.

Firmware Engineer | *Haxiot Inc.* 📍Plano, Texas 📅 03/2017 – 03/2019

- Led the firmware development of LoRaWAN software stacks for a modem. Reduced modem power consumption by 95%. Designed two LoRaWAN developer kits and developed both C and Python library.
- Assisted our manufacturer by developing a Windows application to flash and test batch of modems simultaneously during production and then scan QR of the modems using OpenCV.

Embedded System Engineer | *Next Gen Systems* 📍Arlington, Texas 📅 06/2014 – 07/2016

- Collaborated with three multidisciplinary teams to provide custom-designed hardware solutions for robots to use various types of analog/digital sensors and interfaced them with Robot Operating System.
- Automated MEMS sensor fabrication process and sensor characterization testbed that reduced the production time by 90%, halved the wastage, and nearly doubled the amount of data collection.

Technical Lead (TechshopBD) | *Pi Labs Bangladesh Ltd.* 📍Dhaka, Bangladesh 📅 04/2012 – 07/2013

- Tripled the product sale within 6 months with the help of a dedicated team and by emphasizing on local quality production and customer relations.
- Designed development kits, wrote tutorials, provided technical support, and handled customers first-hand.

Embedded Firmware Engineer | *Pi Labs Bangladesh Ltd.* 📍Dhaka, Bangladesh 📅 08/2010 – 03/2012

- Designed the initial iteration of our Vehicle Tracking System hardware and developed the device driver for the onboard components.

Academic Projects:

Remote Sensor Monitoring – build a low-cost IoT system that remotely monitored sensors (temperature, humidity, force), using Wi-Fi SoC that supports full-stack TCP/IP and Microsoft Azure IoT service.

Academic Credentials:

M.Sc. in Electrical Engineering, The University of Texas at Arlington (UTA), May 2016.

B.Sc. in Electrical Engineering, Ahsanullah University of Science & Technology, July 2009.
